Global trade architecture has evolved considerably since then. After the eight rounds of multilateral trade negotiations (MTNs) under the sponsorship of the General Agreement on Tariffs and Trade (GATT), the trade and economic world of today is strikingly different (Das, 2007). A Hawley-Smoot Act like relapse to protectionism looks impossible. This comprehensive and accessible book examines the evolution of the multilateral trade regime in the ever-changing global economic environment, particularly during the WTO era and the ongoing Doha Round. Professor Das explores how the creation of the multilateral trade regime, or the GATT/WTO system, has been fraught with difficulties. He describes the ways, by means of various rounds of negotiations, the multilateral trade regime has constantly adjusted itself to the new realities of the global economy. A Suggested Citation.
