Why study history? Every student considering a history course should consider this question. Here we provide some possible answers. They think critically about every piece of evidence, testing and evaluating its reliability, credibility, usefulness and significance. All this makes historians and history graduates skilled at locating, handling and evaluating information. Skills like these are not just valued in history, they are in demand in other academic disciplines and a range of professions. History teaches you to think and problem-solve. History can be extraordinarily complex. It requires a great deal of detective work, careful thought and problem-solving. I try to return the focus of the philosophy of history to the nature of understanding, with a particular emphasis on Louis Mink's project of exploring how historical understanding compares to the understanding we find in the natural sciences. On the whole, I come to think of the things they study depend upon and relate to one another. At the same time, however, I claim that historical inquiry naturally puts us in a position to acquire further epistemic goods, including the old-fashioned epistemic good of wisdom, which is plausibly constituted by knowledge of how to live well. This is something the natural sciences cannot offer, and it is part of the reason why history is such an important form of inquiry. Discover the world's research. 20+ million members. Overall, the book is an interesting insight into Korea prior to Japanese annexation in 1910, the Korean War, and rapid modernization. Though the second half (approximately) is more a travel guide than the former half, his travels show a side of pre-modern, rural side of Korea that has mostly been lost with Korea's general modernization. Though not a very "serious" work, it is definitely worth a casual read.
