Negotiating Science: The Critical Role of Argument in Student Inquiry, Grades 5-10

By Brian Hand, Lori Norton-Meier, Jay Staker

Heinemann USA, United States, 2009. Paperback. Book Condition: New. 234 x 190 mm. Language: English. Brand New Book. Knowing from the inside out how argument works is a literacy skill now universally recognized as essential. This is the goal of real reading, writing, and speaking - and finally the gift of real science. I am grateful to the authors of this volume for making these gifts available to science and literacy teachers, but most importantly, to all of our students. - Wendy Saul

Author of Science Workshop The best way to transform students scientific thinking is by transforming their science writing. Writing is thinking and with Negotiating Science you’ll move from rote procedures to the kind of writing that real scientists do. Your students will learn to negotiate meaning from the results of their work and to argue for their ideas - posing questions, documenting evidence, making claims, and sharing data. Perfect for science notebooks! Leading you through an argument-based approach to science writing that is grounded in highly effective practices, Negotiating Science: demonstrates what good science arguments look like through student samples: models and supports top-notch instruction through teaching tools and templates adaptable to any classroom. contains...

Reviews

Thorough guideline for publication fanatics. Better then never, though i am quite late in start reading this one. I am just effortlessly could possibly get a delight of reading a created book.

-- Terry Bailey

The very best book i at any time read. It generally does not price an excessive amount of. I discovered this publication from my dad and i recommended this book to understand.

-- Joesph Hettinger

ABSTRACT The use of argumentation in science education is associated with many benefits. Some of these include developing critical skills, promoting spirit of enquiry, enhancing conceptual understanding and improving academic performance of students. This research will discuss the strength of using scientific argumentation in science education. The findings from other such studies will also be critically reviewed to seek an in-depth understanding of the use of argumentation in teaching and associated challenges. The research would help in improving the use of argumentation in teaching and exploring solution to problems and challenges associated with this method. - Wendy Saul Author of Science Workshop The best way to transform students' scientific thinking is by transforming their science writing. Rat LD50 is the amount of chemical that has a 50% chance of killing a rat with a body mass of 1 kg. For instance, Fe has an LD50 of 30 g/kg. That means 30 grams of iron has a 50% chance of killing a 1 kg rat. The other LD50 values are in mg of chemical per kg of body mass.

a. CuSO₄: How many grams is 300 mg?
b. NaCl: How many grams is 3000 mg?
c. Which chemical requires the least mass to kill a 1 kg rat?

Test Tube Geology Introduction. The earth we live on has the atmosphere (air), hydrosphere (water), and lithosphere (land).
